

Replacement of Little Blue Heron Bridge, Palm Beach County, FL

REPLACEMENT OF THE EXISTING BRIDGE #930194 AND CONSTRUCT A NEW 4 LANE FIXED LOW LEVEL BRIDGE AT LITTLE BLUE HERON Begin December 14, 2009

Construction will begin on Little Blue Heron Bridge on December 14, 2009. The improvements under this contract consist of replacing the structurally deficient Little Blue Heron Bridge.

The estimate completion of construction is April 1, 2011, weather permitting. All of the improvements and construction operations will take place within the Florida Department of Transportation (FDOT) right-of-way.

It is our intent to maintain access to all residences and businesses in the area during this work. While FDOT and its contractors take steps to minimize the impact of construction to the surrounding community, nearby residents and property owners can expect some level of noise, lane and parking restrictions, detours, and occasional obstruction of driveways and cross streets throughout the course of this project.

Every effort will be made to keep such conditions to a minimum. With your cooperation we can make the best of the situation knowing that the resulting improvement will be well worth the inconvenience.
